Declaration Regarding beyond the campus environmental promotion activities

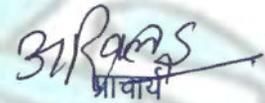

I hereby declare that as part of our commitment to environmental sustainability, the college has actively participated in several environmental promotion activities that extend beyond the campus. These initiatives aim to contribute positively to the local community and foster environmental awareness.

Among these activities, the college has organized **tree plantation drives** and **awareness campaigns**, which include spreading knowledge about the importance of preserving natural resources and maintaining a clean and green environment. These programs have been conducted not only within the campus but also in the surrounding areas to engage the local community in sustainable practices.

Additionally, as part of the **Swachh Bharat Abhiyan**, the college has been involved in **cleanliness drives** in the nearby areas, encouraging people to take responsibility for their environment and contributing to the national movement for a cleaner India. These activities have been supported by the active participation of students, faculty, and local residents.

Detailed supporting documents related to these environmental initiatives, including reports, photographs, and feedback, can be found in Metric 3.4.3.

We are committed to continuing these efforts and will ensure that environmental sustainability remains a core focus in both our academic and extracurricular activities.

Action taken reports and achievement of green campus initiatives.

Sr. No.	Name of Initiatives	Implementation	Achievement
1	Tree Plantation	500+ Trees planted in last 5 years	Appreciation Letter from Gram Panchayat
2	Swatch Bharat Abhiyan	Conducted 2-3 times a year	Appreciation Letter from Gram Panchayat
3	Green Audit	Conducted by External Agency	Report and Certificate Received
4	Energy Audit	Conducted by External Agency	Report and Certificate Received
5	Environment Audit	Conducted by External Agency	Report and Certificate Received
7	Ban on Plastic	Notice taken out	Campus is plastic free
8	Restricted Entry of Vehicle	Circular taken out	No Vehicle Day Celebrated Faculty members are encouraged to use car pooling
9	Paperless Office	Email Communication, ERP Software	Paper usage reduced by 50%
10	Use of renewable energy	Solar System is in place	Electricity bill reduced to 40%
11	Water Conservation	Rain Water Harvesting is in place	Water level increased
12	Waste Management	Waste management strategies for solid, liquid and e-waste are decided	Compost manure generated from solid waste is used for plants and trees in campus
13	Use of Bicycles	Students are encouraged to use bicycles	123 students use bicycles.

1. Executive Summary

The rapid urbanization and economic development at local, regional and global level has led to several environmental and ecological crises. On this background it becomes essential to adopt the system of the Green Campus for the institute which will lead for sustainable development.

Sw DayaShankar Patel is deeply concerned and unconditionally believes that there is an urgent need to address these fundamental problems and reverse the trends. Being a premier institution of higher learning, the college has initiated 'The Green Campus' program that actively promote the various projects for the environment protection and sustainability.

The purpose of the audit was to ensure that the practices followed in the campus are in accordance with the Green Policy adopted by the institution. The methodology include: physical inspection of the campus, observation and review of the documentation, interviewing key persons, data analysis, measurements and recommendations. It works on the several facets of 'Green Campus' including Water

Conservation, Tree Plantation, Waste Management, Paperless Work and Alternative Energy. With this in mind, the specific objectives of the audit are to evaluate the adequacy of the management control framework of environment sustainability as well as the degree to which the departments are in compliance with the applicable regulations, policies and standards. It can make a tremendous impact on student's health and learning college operational costs and the environment. The criteria, methods and recommendations used in the audit are based on the identified risks.

1.1 Introduction

Green Audit can be defined as systematic identification, quantification, recording, reporting and analysis of components of environmental diversity. The 'Green Audit' aims to analyze environmental practices within and outside the college campus, which will have an impact on the eco-friendly ambience. It was initiated with the motive of inspecting the work conducted within the organizations whose exercises can cause risk to the health of inhabitants and the environment. Through Green Audit, one gets a direction as how to improve the condition of environment and there are various factors that have determined the growth by carrying out Green Audit.

Green audit is assigned to the criteria 7 of NAAC, National Assessment and Accreditation Council which is a self-governing organization of India and it declares the institutions as Grade A++, A+, A, B++, B+, B or C according to the scores assigned during the accreditation.

1.2 About the College

This college is an affiliated College of University of Lucknow, was founded in January 2004 within the premises of a large campus in Chinhat, Lucknow, Uttar Pradesh, India.

Sw Dayashankar Patel is a self-financing institution managed by the members of Management Committee. The committee members belong to various walks of life.

The campus with well-built Class Rooms, Fully Equipped Laboratories, Modern Computer Lab and a Well-Stocked Library . The management has also taken all efforts to build a team of committed faculty members, who form an integral part in the growth and development of the college.

VISION:

Our Goal is to support and nurture the students to be life-long learners.

MISSION:

- To contribute effectively to the welfare of society, address the local and global challenges, respecting culture, environment and sustainability
- To impart quality education through recruiting competent faculty and by providing good infrastructure and resources.

Objectives of the Study

The main objective of the green audit is to promote the Environment Management and Conservation in the College Campus. The purpose of the audit is to identify, quantify, describe and prioritize framework of Environment Sustainability in compliance with the applicable regulations, policies and standards. The main objectives of carrying out Green Audit are: Accordingly, Green Audit mainly emphasize the following key areas-

1. Saving power :

This includes energy saving where the authorities identifies way to save electric, natural gas, and other forms of power that are inefficient or being wasted in the organization. This is done by recommending more efficient electric heating & cooling etc.

2. Saving water:

This involves educating the employees on ways to save, reuse precious water resources both inside & outside the premises. The basic emphasis should be to reduce water consumption.

3. Greening the work place:

This is achieved by designing a greener office space. This involves use of alternate power sources like solar power, reducing biological contaminants like pesticides, implementing green landscaping option & rain water harvesting.

4. Driving Green:

Vehicle driving is one of the largest contributors to both energy use & environmental pollution. The employees' should be trained to make more fuel efficient driving choices, optimize fuel consumption & consider alternate fuel vehicles. Possibilities to use public transport or group travelling have also to be explored for reduced gas emissions. Periodic emission tests need to be conducted to check for efficient fuel consumption.

2. Methodology

In order to perform green audit, the methodology included different tools such as physical inspection of the campus, observation and review of the documentation, interviewing key persons and data analysis, measurements and recommendations. The study covered the following areas to summarize the present status of environment management in the campus:

- ❖ Water management
- ❖ Energy conservation
- ❖ Waste management
- ❖ E-waste management
- ❖ Green area management

3. Observations and Recommendations

3.1 Water Use

This indicator addresses water consumption, water sources, irrigation, storm water, appliances and fixtures. A water audit is an on-site survey and assessment to determine the water use and hence improving the efficiency of its use.

Observations

The study observed that ground water, bore well and rain water is major sources of water. Water is used for drinking purpose from RO after treatment there is one RO water cooler having capacity 400 liters per hour. Water is used for toilets, Cleaning and gardening purpose. During the survey, no loss of water is observed, neither by any leakages nor by over flow of water from overhead tanks. The data collected from all the departments is examined and verified. On an average the total use of water in the college is 5,000 L/day, which include 2,000 L/day for domestic purposes, 1,500 L/day for gardening and 500 L/day for Others.

Test Report

Sr. No.	Parameters	Results	Acceptable Limit as per IS 10500: 2012	Units
1.	Color	1	Max. 5	Hazen Units
2.	Odour	Agreeable	Agreeable	-
3.	pH	7.12	6.5-8.5	-
4.	Turbidity	0.6	Max. 1	N.T.U.
5.	Total Dissolved Solids	124	Max. 500	mg/L
6.	Calcium (as Ca)	9	Max. 75	mg/L
7.	Chloride (as Cl)	9.0	Max. 250	mg/L
8.	Fluoride (as F)	<0.05	Max. 1	mg/L
9.	Iron (as Fe)	<0.06	Max. 0.3	mg/L
10.	Magnesium (as Mg)	5.8	Max. 30	mg/L
11.	Nitrate (as NO ₃)	6.02	Max. 45	mg/L
12.	Sulphate (as SO ₄)	13.13	Max. 200	mg/L
13.	Alkalinity (as CaCO ₃)	38	Max. 200	mg/L
14.	Total Hardness (as CaCO ₃)	48	Max. 200	mg/L
15.	<i>E.coli</i>	Absent	Not Detectable	/100 ml
16.	Total Coliforms	Absent	Not Detectable	/100 ml

Recommendations

- ❖ Minimize wastage of water and use of electricity during water filtration process, if used, such as RO filtration process and ensure that the equipment's used for such usage, are regularly serviced and the wastage of water is not below the industry average for such equipment's used in similar capacity.
- ❖ Ensure that all cleaning products used by college staff have a minimal detrimental impact on the environment, i.e. are biodegradable and non-toxic, even where this exceeds the Control of Substances Hazardous to Health (COSHH) regulations.
- ❖ The college has to take actions to strengthen rain water harvesting. Rain water harvesting for separate buildings are lacking. Measurement of quantity of water obtained from the rain water harvesting should be done.
- ❖ Need of monitoring, controlling overflow is essential and periodically supervision drills should be arranged. In campus small scale/medium scale/ large scale reuse and recycle of water system is necessary.

3.2 Energy Use and Conservation

This indicator addresses energy consumption, energy sources, energy monitoring, lighting, appliance, natural gas and vehicles. Energy use is clearly an important aspect of campus sustainability and thus requires no explanation for its inclusion in the assessment.

Observations

Energy source utilized by all the departments and common facility center is electricity and Solar Panels.

All the departments and common facility centers are equipped with LED lamps. Approximately 100 plus LED were counted during survey. Besides this, recently Solar Panels were Installed in the Campus as an alternate renewable source of energy. Equipment like Computers is used with power saving mode. Also, campus administration runs switch-off drill on regular basis. In all departments electricity was shut down after occupancy time as one of the practices for energy conservation.

Recommendations

- ❖ This includes evaluation of procurement practices with ISO 50001. This does not exactly mean that you need to buy the most efficient, but you need to buy the most efficient which is financially viable.
- ❖ Give preference to the most energy efficient and environmentally sound appliances available, this includes only using energy-saving light bulbs
- ❖ Monitor and understand the importance of different sources of college energy consumption, and set appropriate and measurable targets for a reduction certain areas of consumption and/or in the overall consumption of energy.
- ❖ Ensures that all electronic and electrical equipment's, such as computers, are switched off when not in use.
- ❖ Centralized controls of lighting, auditorium etc. to avoid any miss-use of electricity
- ❖ Installation of LED lamps instead of CFL.
- ❖ Installation of Solar panels, Power Purchase Agreements with Solar Power Plant Owners to buy environmentally friendly energy Source etc.
- ❖ Shift to paperless regime wherever not required, example attendance muster replaced by biometrics, DG logbook replaced by computerised logbook, daily reports converted from paper to paper less, HOD meetings converted to paperless formats, and all such examples.
- ❖ Appreciate that it is preferable to purchase electricity from a company that invests in new sources of renewable and carbon-neutral electricity.
- ❖ If there are equipment's running on standby mode, reduce the energy consumption on standby mode or minimize the running of equipment's on standby mode.

3.3 Waste Generation

This indicator addresses waste production and disposal of different wastes like paper, food, plastic, biodegradable, construction, glass, dust etc. and recycling. Furthermore, solid waste often includes wasted material resources that could otherwise be channeled into better service through recycling, repair and reuse. Solid waste generation and management is a burning issue. Unscientific handling of solid waste can create threats to everyone. The survey focused on volume, type and current management practice of solid waste generated in the campus. The different solid wastes collected as mentioned above.

Observations

The total solid waste collected in the campus is 10-15 kg/day. Waste generated from tree droppings is a major solid waste in the campus. The waste is segregated at source by providing separate dustbins for Bio-degradable and Non Bio-degradable waste. Segregation of solid waste generated in all areas is also practiced. Single sided used papers reused for writing and printing in all departments. Important and confidential reports/ papers are sent for recycling after completion of their preservation period to central store. Metal waste and wooden waste is stored and given to authorized Scrap agents for further processing. The institute has adopted Composting Method. The main purpose of this is to reduce disposable waste in the college campus. After complete process of composting, it is used as manure in the garden and lawns.

Recommendations

- ❖ Reduce the absolute amount of waste that produces from college staff offices.
- ❖ Make full use of all recycling facilities provided by Nagar panchayat and private suppliers, including glass, cans, white coloured and brown paper, plastic bottles, batteries, print cartridges, cardboard and furniture.
- ❖ Provide sufficient, accessible and well-publicized collection points for recyclable waste with responsibility for recycling clearly allocated.
- ❖ Single sided papers to be used for writing and photocopy
- ❖ Important and confidential papers after their validity to be sent for pulping.

3.4 E-Waste Generation

E-waste can be described as consumer and business electronic equipment that is near or at the end of its useful life. This makes up about 5% of all municipal solid waste worldwide but is much more hazardous than other waste because electronic Components contain cadmium, lead, mercury and Polychlorinated biphenyls (PCBs) that can damage human health and the environment.

Observations

The E-waste generally includes the tube lights, CFL, LED are stored into the scrap yard of college and stored. This waste material is yet to be disposed. E-waste generated in the campus is very less in quantity. The college has total of 15 computers and 3 printers in working condition. The cartridges of laser printers are refilled outside the college campus. Administration conducts the awareness programmes regarding E-waste Management with the help of various departments. The E- waste and defective item from computer laboratory is being stored properly. The institution has decided to contact approved E-waste management and disposal facility in order to dispose E-waste in scientific manner.

The audit team noted that the technical life time / service life of most of the electronic equipment's is yet to be over, thus the presently there is limited generation of waste. However, college needs to device long term and regularized policy of the e -waste disposal.

Recommendations

- ❖ Use reusable resources and containers and avoid unnecessary packaging where possible.
- ❖ Recycle or safely dispose of white goods, computers and electrical appliances
- ❖ Always purchase recycled resources where these are both suitable and available.

3.5 Green Area

This includes the plants, greenery and sustainability of the campus to ensure that the buildings conform to green standards. This also helps in ensuring that the Environmental Policy is enacted, enforced and reviewed using various environmental awareness programmes.

Observations

To create- green cover, eco-friendly atmosphere, pure oxygen at the college campus, plantation program is organized every year with involving all students, principal and all departments faculty members.

Campus is located in the vicinity of approximately 10+ types (species) of trees. Total 64 trees are available in the college campus. Various tree plantation programs are being organized during the month of July and August at college campus and surrounding villages through NSS unit. This program helps in encouraging eco- friendly environment which provides pure oxygen within the institute and awareness among villagers. The plantation program includes plantation of various type of indigenous species of ornamental and medicinal as well as wild plant species. Under the biodiversity and ecological survey. Rain water harvesting plant is well maintained. College also maintained guava and pomegranate garden in premises.

Plantation of diversified species:

To create-green cover, eco-friendly atmosphere, pure oxygen at the college campus, plantation program is organized every year with involving all students, principal, and all departments faculty members. In this session Tree plantation day program was organized were ornamental, avenue, medicinal plant with rare and exotic beautiful trees was planted in college campus. To keep the greeneries in the campus, we regularly maintain the gardens which are looked by staff under the guidance of garden committee members. Moreover, every year we try to plant new trees. Seasonal flower garden is also a unique feature of this college.

Recommendations

- ❖ Review periodically the list of trees planted in the garden, allot numbers to the trees and keep records. Give scientific names to the trees.
- ❖ Promote environmental awareness as a part of course work in various curricular areas, independent research projects and community service.
- ❖ Create awareness of environmental sustainability and take actions to ensure environmental sustainability.
- ❖ Establish a College Environmental Committee that will hold responsibility for the enactment, enforcement and review of the Environmental Policy. The Environmental Committee shall be the source of advice and guidance to staff and students on how to implement this Policy.

- ❖ Ensure that an audit is conducted annually and action is taken on the basis of audit report, recommendation and findings.
- ❖ Celebrate every year 'Environment Day' and plant trees on this day to make the campus more Green.

4. Acknowledgement

We are grateful to the committee members of SW DAYA SHANKAR PATEL COLLEGE SITAPUR to award this prestigious project and allowed us to enter the new era of Green Audit in the College Campus.

Further we sincerely thank the college staff for providing us necessary facilities and co-operation during the audit. This helped us in making the audit, a success.

Further we hope, this will boost the new generation to take care of Environment and propagate these views for many generations to come.

AUDIT CERTIFICATE

SW DAYA SHANKAR PATEL MAHAVIDYALAYA

Conclusion and Summary of Findings

1. The College has Rainwater harvesting system which is efficient and sufficient.
2. The College has waste management methods in place and E- Waste is disposed off systematically and in timely a manner.
3. College has provided wet waste, dry waste and semi dry waste bins for segregation and collection of solid waste. This has been done in entire campus in open space and inside the buildings. The system is working efficiently.
4. The College has created great awareness among the students and staff about the green practices.
5. The College is well landscaped and the green cover is reasonably good and they are found to be increasing the green cover on a continuous basis.
6. The College canteen waste is composted and used as manure for the green cover of the campus.
7. The College has composting units wherein entire bio-degradable waste is converted into compost manure and is used for organic farming of fruits and vegetables in the campus.
8. The water quality in the campus is tested and found potable.
9. The College has provided RO treated water for drinking to every students

10. Noise level in Classrooms and labs is found less than 50 db which is within the safe limits as per Noise Pollution Control rules, 2000.
11. All results of Illumination studies (Classrooms) found within limit as per Factory rules Section 35 Schedule b.
12. Ventilation was found Excellent.
13. LEDs, Solar Panels are used to conserve energy.

**For Ultraquery Technologies,
Authorised Signatory**

Academic Year	2021-22
Name of the Activity	Tree Plantation
Date of the Activity	22/08/2021
Number of Students	88
Number of Teachers	9
Organized By	Extension Activity Cell
Objective	The purpose of Tree Plantation is to save the endangered environment and to beautify our life.
Brief Report	Trees play a vital role in enhancing the environment by producing oxygen, improving air quality, regulating the climate, conserving water, protecting soil, and supporting wildlife. Through the process of photosynthesis, trees absorb carbon dioxide and release the oxygen essential for life. To safeguard nature and mitigate the effects of global warming, it is crucial to raise awareness about tree plantation and conservation. As part of an NSS initiative, we organized a tree plantation drive at Adhuri village, located near our district's college, aiming to contribute to the environment and promote sustainable practices in the community.

Academic Year	2021-22
Name of the Activity	AIDS Awareness
Date of the Activity	01/12/2021
Number of Students	77
Number of Teachers	9
Organized By	Extension Activity Cell
Brief Report	<p>AIDS (Acquired Immunodeficiency Syndrome) is a disease caused by the HIV (Human Immunodeficiency Virus). HIV attacks the body's immune system, which makes it harder for the body to fight infections. If not treated, HIV can lead to AIDS, a serious stage of the disease. Awareness about HIV and AIDS helps people protect themselves and others, and encourages those who need help to seek treatment and support. Everyone can play a part in stopping the spread of HIV by being informed and spreading the message of prevention.</p>

Environment and Energy Usage

Policy Document on Environment and Energy Usage

The College is firmly committed to sustainable development across all its functions and activities. This policy aims to guide environmentally responsible energy usage and resource management, embedding sustainability into our institutional ethos.

Policy Statement

The primary goal of this Environment and Energy Usage Policy is to manage energy and environmental resources in a structured and efficient manner to minimize ecological impact. The policy is applicable to all institutional units, stakeholders, and operational activities.

The College aspires to cultivate a Clean and Green Campus by promoting eco-conscious practices and sustainability initiatives within and beyond campus boundaries. Emphasis is placed on effective waste management, water conservation, and the exploration of renewable energy sources to mitigate environmental challenges.

This policy aims to instill environmental consciousness and efficiency in day-to-day practices, fostering a culture of accountability in conserving natural resources and promoting sustainable development.

Objectives

- To raise awareness about environmental issues and sustainability.
- To foster responsibility for energy conservation among all stakeholders.
- To implement efficient and sustainable waste management systems.
- To reduce waste generation across academic and administrative activities.
- To adopt and promote water conservation and management practices.
- To encourage and expand green initiatives on and off campus.
- To maintain cleanliness and ensure a hygienic campus environment.
- To provide a pollution-free, health-supportive academic setting.

Implementation Plan and Key Focus Areas

To achieve the objectives outlined above, the College will focus on the following core areas:

A. Energy Conservation and Management

- Installation and use of energy-efficient LED lighting across campus.
- Adoption of power-saving equipment and technology.
- Display of "Save Energy" awareness posters at key locations.
- Maximizing the use of natural lighting and ventilation wherever feasible.
- Ongoing evaluation and improvement of energy consumption practices.
- Allocation of necessary resources to support energy goals.

B. Waste Management (Solid, Liquid & E-Waste)

- On-campus segregation of waste at source.
- Implementation of the 4R principles: Reduce, Reuse, Recycle, and Refuse.
- Minimization of overall waste generation.
- Installation and use of sanitary napkin incinerators and disposal units.
- Preference for eco-friendly materials in packaging, décor, and gift items.
- Conducting "Best out of Waste" activities to encourage recycling.
- Reducing paper usage through tech-enabled administration and teaching.
- Development of a structured waste management system.

C. Water Conservation and Management

- Utilization of rainwater harvesting systems and recharge pits.
- Regular maintenance to repair leaks and ensure efficient water use.
- Plantation of native and drought-resistant flora across the campus.
- Display of "Save Water" awareness signage.
- Organizing water conservation campaigns for students and staff.
- Replacement of old fixtures with water-saving devices.

D. Clean and Green Campus Initiatives

- Maintaining a healthy green cover with native trees and plants.
- Organizing tree plantation drives periodically.
- Formation of a Nature Club to engage students and staff in environmental efforts.
- Encouraging the use of bicycles and public transport; promotion of pedestrian-friendly pathways.
- Ensuring overall campus hygiene and sanitation.

E. Paperless Operations

- Transition to a digital-first approach via e-office systems and digital communication.
- Use of cloud-based storage systems (e.g., Google Drive, NAS Servers).
- Utilization of digital platforms like WhatsApp and Google Classroom for academic communication.
- Active presence on digital platforms such as Instagram, YouTube, and a fully functional college website.

F. Elimination of Single-Use Plastics

- Enforcement of a ban on single-use plastics across campus.
- Conduct awareness programs on the harmful effects of plastic pollution.
- Promotion of sustainable alternatives such as cloth and jute bags.
- Preference for eco-conscious products for all institutional events and ceremonies.

G. Environmental Awareness and Activities

- Integration of Environmental Education into the academic curriculum.
- Organizing green literacy programs, awareness drives, and sustainability projects.

स्व० दयाशंकर पटेल महाविद्यालय
कथा गाजापुर, महाराष्ट्र (जिल्हा ३७)

- Encouraging student-led environmental initiatives, including fieldwork and internship-based projects.
- Engaging faculty, staff, and students in eco-centric activities and campaigns.

H. Disaster Preparedness and Risk Management

- Conducting awareness and orientation programs on disaster response.
- Establishing early warning communication mechanisms.
- Designation of safe assembly zones in case of emergencies.
- Development of community support mechanisms during and post-disaster events.

Conclusion

This policy shall be communicated to all stakeholders, including students, faculty, staff, and administrative personnel. Regular reviews and updates will be conducted to align with evolving environmental standards and institutional needs.

All members of the College community are expected to adhere to this policy and contribute actively toward building a green, clean, and sustainable campus environment.

POLICY DOCUMENT ON THE GREEN CAMPUS

Sw Daya Shankar Patel Mahavidyalaya is a quality conscious college. It protects its own environment with its green campus initiative and keeps pollution free campus. Environment development is its basic work with the educational policies implemented on the campus. The green atmosphere of the college is largely due to tree plantation. There are different types of trees and plants in the campus. Trees have nearly covered the fencing area. They help to maintain the ecosystem. Planting of saplings by the Management, Principal, Teachers, Students and Staff at various functions inbuilt an eco consciousness in the college practices. Planting a large number of trees in the villages is one of the regular features of the NSS Camps. The trees are planted in the villages by the NSS volunteers and also at the places from where the fetches the admission is a remarkable to the college.

Our environmental policy:

- To create awareness regarding environmental policy amongst the students, management and nearby villagers.
- As per the govt. rules and regulations regarding the instructions of tobacco free campus signboards are displayed at various places on the campus. Pollution free campus is maintained by avoiding tobacco, pan-masala, chewing on the campus.
- To sensitize the students and staff regarding the use of drinking water properly for which, we have provided purified (RO aqua-guard) drinking water facilities on the campus.
- To bring in use the 'Rain Water Harvesting' on the campus. We have collected the rain water from the college roof and it is percolated in the land through bore well.
- Circular by Principal every year regarding use of public transport or carpooling or use of bicycle. It helps to save the fuel, avoids the environmental pollution.
- To maximize the use of ICT and minimize the use of paper. It will help to go towards 'Paperless Office'.
- To use the solid waste through vermin-compost on the campus and use it as a fertilizer.
- To reduce the 'sound pollution in the campus, we have built the seating arrangements in the shade of trees in our campus.
- To use 'Use me' Dry and Wet dust bins in the college campus so as to keep college campus clean.
